SUMMARY

Full-stack engineer with 3 years of production experience in TypeScript, Next.js and NestJS. Software Engineer II at Synergy Financial Advisers, a Singapore company, where I own the tenant application and build the core super app and its authentication. Top Rated on Upwork (100% Job Success, 1,000+ hours) and lead engineer on GoTypical, taking a client's concept to a live platform across product, UI design, cloud and DevOps. I build with AI agents every day: they handle much of the build while each project's knowledge base, reviews and tests keep the quality bar high, so features ship end to end much faster.

EXPERIENCE

Synergy Financial Advisers Ltd, Singapore (remote) — Jul 2024 – Present
Software Engineer II — *Mar 2026 – Present*
Software Engineer — *Jul 2024 – Mar 2026*

- Build and scale the company's core super app in Next.js (App Router, SSR/SSG), the platform the business runs its day-to-day operations on.
- Own the tenant application end to end, from feature design and delivery to production issues.
- Built multi-method authentication with OAuth, Passkey (WebAuthn), credentials and QR-code login, keeping sign-in secure without slowing users down.
- Introduced a Redis cache-aside layer that lowered query latency and server load during peak traffic.
- Set up CI/CD pipelines and Docker-based environments for consistent, zero-downtime releases.
- Use AI-assisted development every day to speed up delivery and automate repetitive work.
- Built a shared library of components and utilities used across the company's projects; review code and write technical documentation for the team.

Upwork, Freelance Full-Stack Engineer (remote) — Aug 2025 – Present
Top Rated · 100% Job Success · 1,000+ hours · 5.0/5 client reviews
Lead Engineer, GoTypical (client project, gotypical.com) — *May 2026 – Present*

- Turned the client's product concept into a live platform in Next.js 16 and Prisma: marketing site, logged-in app, admin, and 420+ programmatic SEO pages.
- Built Stripe subscriptions with exactly-once webhook processing, command-palette search on Algolia with a daily index reconcile, and realtime direct messages with Pusher.
- Run cloud and DevOps on Vercel: a versioned release pipeline with CI checks, Docker-based tooling, daily backups with a tested restore runbook, bot protection, rate limits and Sentry monitoring.
- Raised technical SEO health from 94 to 100 and cut crawl errors from 166 to 2 in about ten weeks.
- Built an AI-native delivery system for the project: a living knowledge base of its architecture, patterns, rules and decisions, plus review, test and build gates, so AI agents ship features end to end without lowering quality.
- **Other clients:** a Next.js + Supabase web app, a Next.js 15 / React 19 storefront on Medusa.js, and an AI-tools research and SEO community app (rated 5.0/5).

Folkatech, Bandung, Indonesia — Oct 2023 – Jul 2024
Full Stack Engineer (contract)

- Delivered full-stack web apps and landing pages for agency clients: Next.js, React and Vue on the front end, NestJS and Laravel APIs on PostgreSQL and MySQL.
- Turned client requirements into shipped features on tight deadlines in Agile sprints, and led debugging of production issues to keep downtime low.
- Wrote reusable, documented code and tuned performance across the stack for faster load times.

Internships

- **Telkom Indonesia (Digital Amoeba), Front-End Developer Intern, Feb – Jun 2023.** Built the innovation lab's new landing page (Next.js, Framer Motion) and the front end of Ideabox, a multitenant idea platform for TelkomGroup.
- **Telkomsel, Software Developer Intern, Aug – Dec 2022.** Built I-Recruitment, Telkomsel's job portal (Next.js, NestJS, MySQL).

SELECTED PROJECTS

- **Roam:** full-stack travel app with an interactive trip map, real-time chat and reviews (Next.js, Supabase). roam-travel.vercel.app
- **Portfolio:** case studies with interactive device showcases (Next.js 15, Tailwind CSS, Framer Motion). reihanmanzis-swe.vercel.app

EDUCATION

Universitas Pendidikan Indonesia, Bachelor of Computer Science (Software Engineering) 2020 – 2024
GPA 3.90 / 4.00, cum laude. Thesis: Next.js security features tested against the OWASP Top 10.

SKILLS

Front end: TypeScript, JavaScript, React, Next.js (App Router), Tailwind CSS, Framer Motion
Back end & data: Node.js, NestJS, Express, Prisma, PostgreSQL, MySQL, Supabase, Redis
Integrations: Stripe, Algolia, Pusher, Resend, OAuth, Passkey (WebAuthn)
Cloud & tooling: Vercel, Docker, CI/CD, Sentry, Git
AI development: AI-native and agentic workflows, Claude Code, Cursor, prompt engineering, project knowledge bases
Languages: English (fluent), Indonesian (native)
